|      |   |               |  | 419   |   |

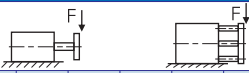

## Installation and application

- When load changes in the work, the cylinder with abundant output capacity shall be selected.
- Relative cylinder with high temperature resistance or corrosion resistance shall be chosen under the condition of high temperature or corrosion.
- Necessary protection measure shall be taken in the environment with higher humidity, much dust or water drops, oil dust and welding dregs.
- Dirty substances in the pipe must be cleared away before cylinder is connected with pipeline to prevent the entrance of particles into the cylinder.
- The medium used by cylinder shall be filtered to 40 μ m or below.
- The cylinder shall avoid the influence of side load in operation to maintain the normal work of cylinder and extend the service life.
- Anti-freezing measure shall be adopted under low temperature environment to prevent moisture freezing.
- If the cylinder is dismantled and stored for a long time, please conduct anti-rust treatment to the surface. Anti-dust cap shall be inserted into the inlet and outlet ports. As the precision of the manufacture and guide is high, never dismantle the fixed block or cylinder cover without permission.

# Tri-rod cylinder

TCL,TCM Series

## Symbol

## Product feature

- JIS standard is implemented.
- Two guides of special bearing steel and linear bearing or bronze bearing guide are used to prevent rotating. They can bear high torque and radial load.  
★ Note: Steel ball linear bearing: It is suitable for elevation action of cylinder or the situation requiring high precision and high bearing ability, especially for the situation requiring low friction action process.  
Bronze sliding bearing: it is suitable for the action that has radial load resistance. Compared with normal cylinder of same use, the horizontal impact resistance is doubled and it has stronger torsion rigidity.
- Drive unit and guide unit are in the same barrel that no additional accessories are needed with minimal space required. The air intake is optional and it is convenient to install.
- The bottom, back side and fixing plate of main body respectively has two exact orientation orifices (See  $\Phi PA$  orifice and the orifice in XX point), which can provide orientation installation with high precision for the special situation.
- Options of switch mounting with provision 4 mounting slots.
- Special design of main body provides multi-mount;

- ① Retract position.  
② PT thread, NPT thread and G thread are available. Add) Refer to P419~442 for detail of sensor switch.

## Stroke

| Bore size (mm) | Standard stroke (mm) |    |    |    |    |    |    |    |    |     |     |     |     |     |     |     | Max. stroke |     |
|----------------|----------------------|----|----|----|----|----|----|----|----|-----|-----|-----|-----|-----|-----|-----|-------------|-----|
| 12             | 10                   | 20 | 25 | 30 | 40 | 50 | 60 | 70 | 75 | 80  | 90  | 100 | 125 | 150 | 150 |     |             |     |
| 16             | 10                   | 20 | 25 | 30 | 40 | 50 | 60 | 70 | 75 | 80  | 90  | 100 | 125 | 150 | 175 | 200 | 200         |     |
| 20/25          | 20                   | 25 | 30 | 40 | 50 | 60 | 70 | 75 | 80 | 90  | 100 | 125 | 150 | 175 | 200 | 225 | 250         | 250 |
| 32, 40, 50, 63 | 25                   | 30 | 40 | 50 | 60 | 70 | 75 | 80 | 90 | 100 | 125 | 150 | 175 | 200 | 225 | 250 | 250         |     |

Note) If non-standard stroke is ordered, backing plate will be added in the cylinder of standard stroke if the gap of the standard stroke and non-standard stroke is 1mm ( $\Phi 12\sim\Phi 32$ ) or 5mm ( $\Phi 40\sim\Phi 63$ ). For example, the non-standard stroke cylinder with a stroke of 28mm is transformed from the standard cylinder whose standard stroke is 30mm through adding a pad and their shape and dimension are the same.

## Ordering code

**TC M 50  $\times$  50 S**

- Model**: TC: Tri-rod cylinder(Double acting type)
- Bearing type**: L: Linear bearing, M: Bronze bearing
- Bore size**: 12 16 20 25 32 40 50 63
- Thread type** ①: Blank: PT, T: NPT, G: G
- Magnet**: S: With magnet
- Stroke**: Refer to stroke table for details

① When the thread is standard, the code is blank. Add) TC Series are all with magnet.

## How to mount

**Fixation of screw on top surface**

**Fixation of screw at bottom surface**

**Fixation of T slot at bottom**

**Fixation of screw at back side**

**Dimensions:** A (mm) and  $\Phi D$  (mm) for orifice for leader.

| Bore size\Item | A   | D(Min) |
|----------------|-----|--------|
| 12             | 41  | 8      |
| 16             | 46  | 10     |
| 20             | 54  | 12     |
| 25             | 64  | 14     |
| 32             | 78  | 18     |
| 40             | 86  | 18     |
| 50             | 110 | 22     |
| 63             | 124 | 22     |
